EVEN·X

KEY OF TIME

Sol system 2521 AD

The planetary system of our sun is new, fast and explored manned spaceships. Many people leave the earth captured by the longing to discover new worlds. Colonies and Bases are also established in the most remote locations of the Sol system.

Some brave people set out into interstellar space to travel to distant planets in our galaxy.

The "Cybernetic War", which begins in 2995 AD, stops this development.

At the end of the war in 3000 AD it will the Solar Parliament formed. Biological and biogenic humanity will form from now on together the new humanity of the Sol system.

A new era is introduced in the Sol system.

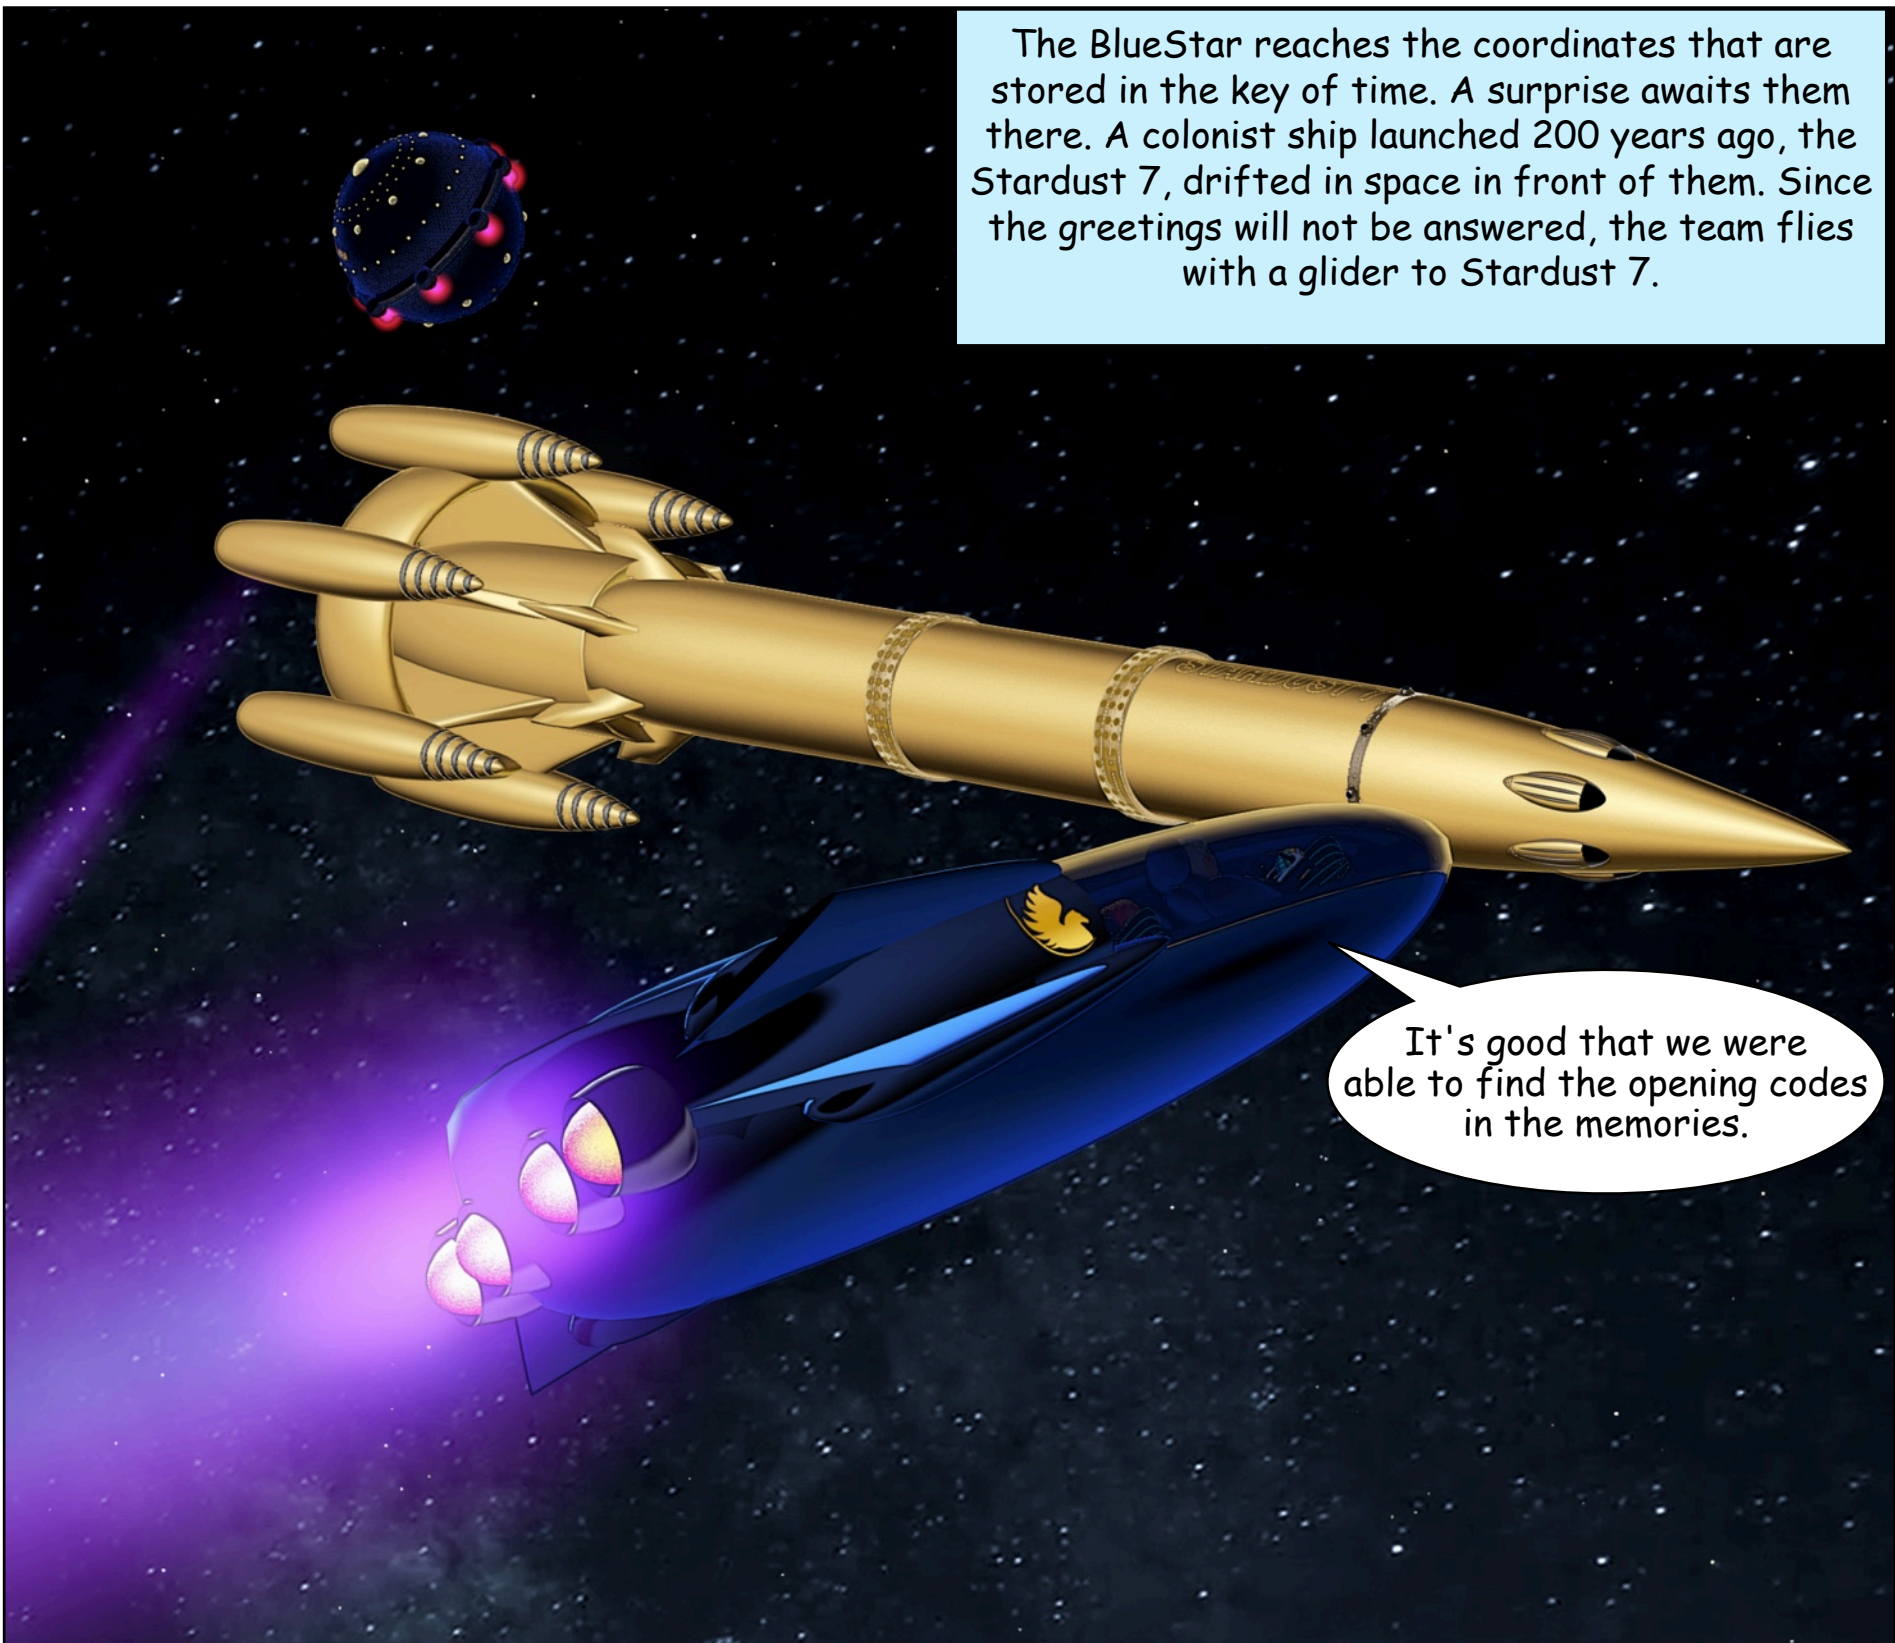

The year 1 ST (solar time) begins.

In 196 ST a small special unit is formed, which is able to research strange processes in space.

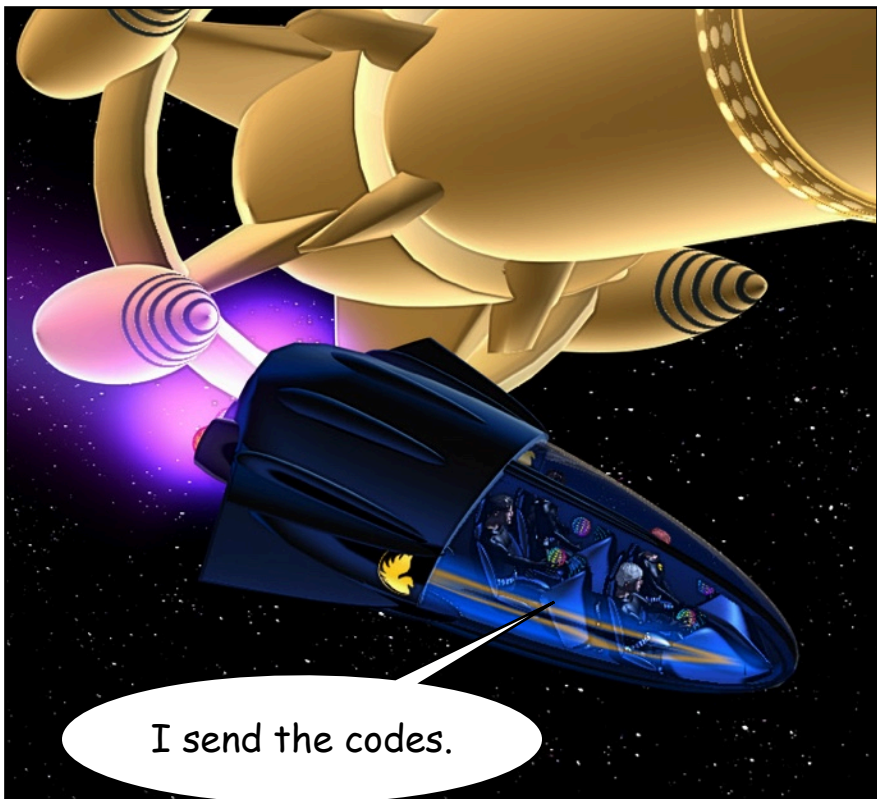

The EVEN·X

After a long journey through space and time, the Stardust 7 arrives in the present: REUNION

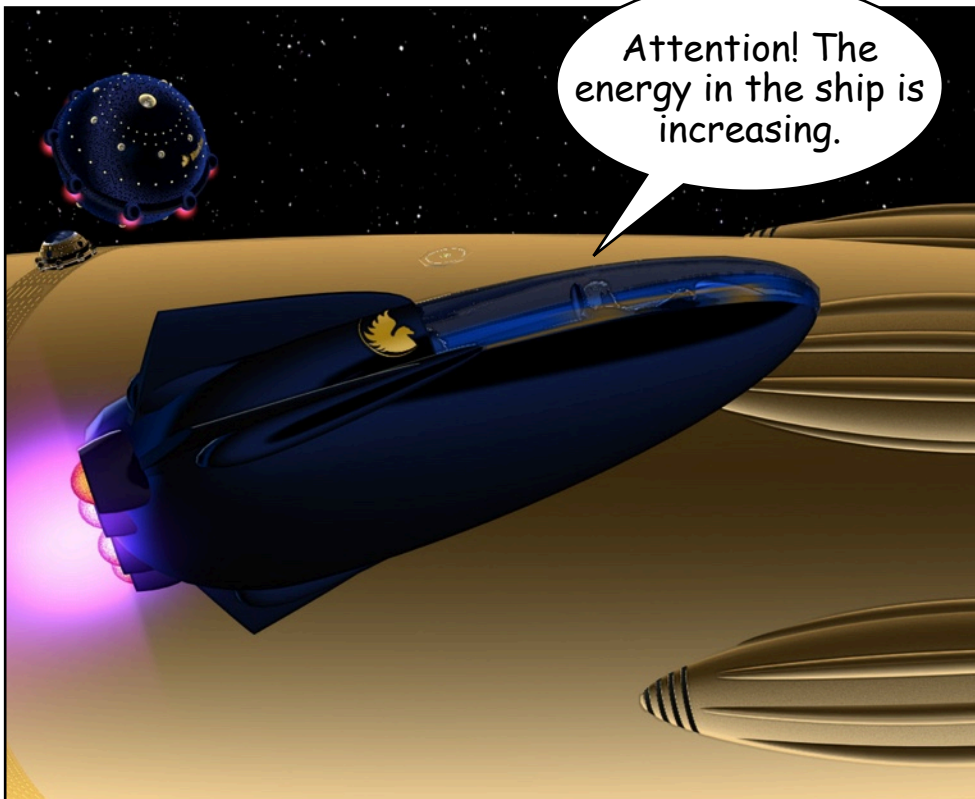

The BlueStar reaches the coordinates that are stored in the key of time. A surprise awaits them there. A colonist ship launched 200 years ago, the Stardust 7, drifted in space in front of them. Since the greetings will not be answered, the team flies with a glider to Stardust 7.

It's good that we were able to find the opening codes in the memories.

I send the codes.

Attention! The energy in the ship is increasing.

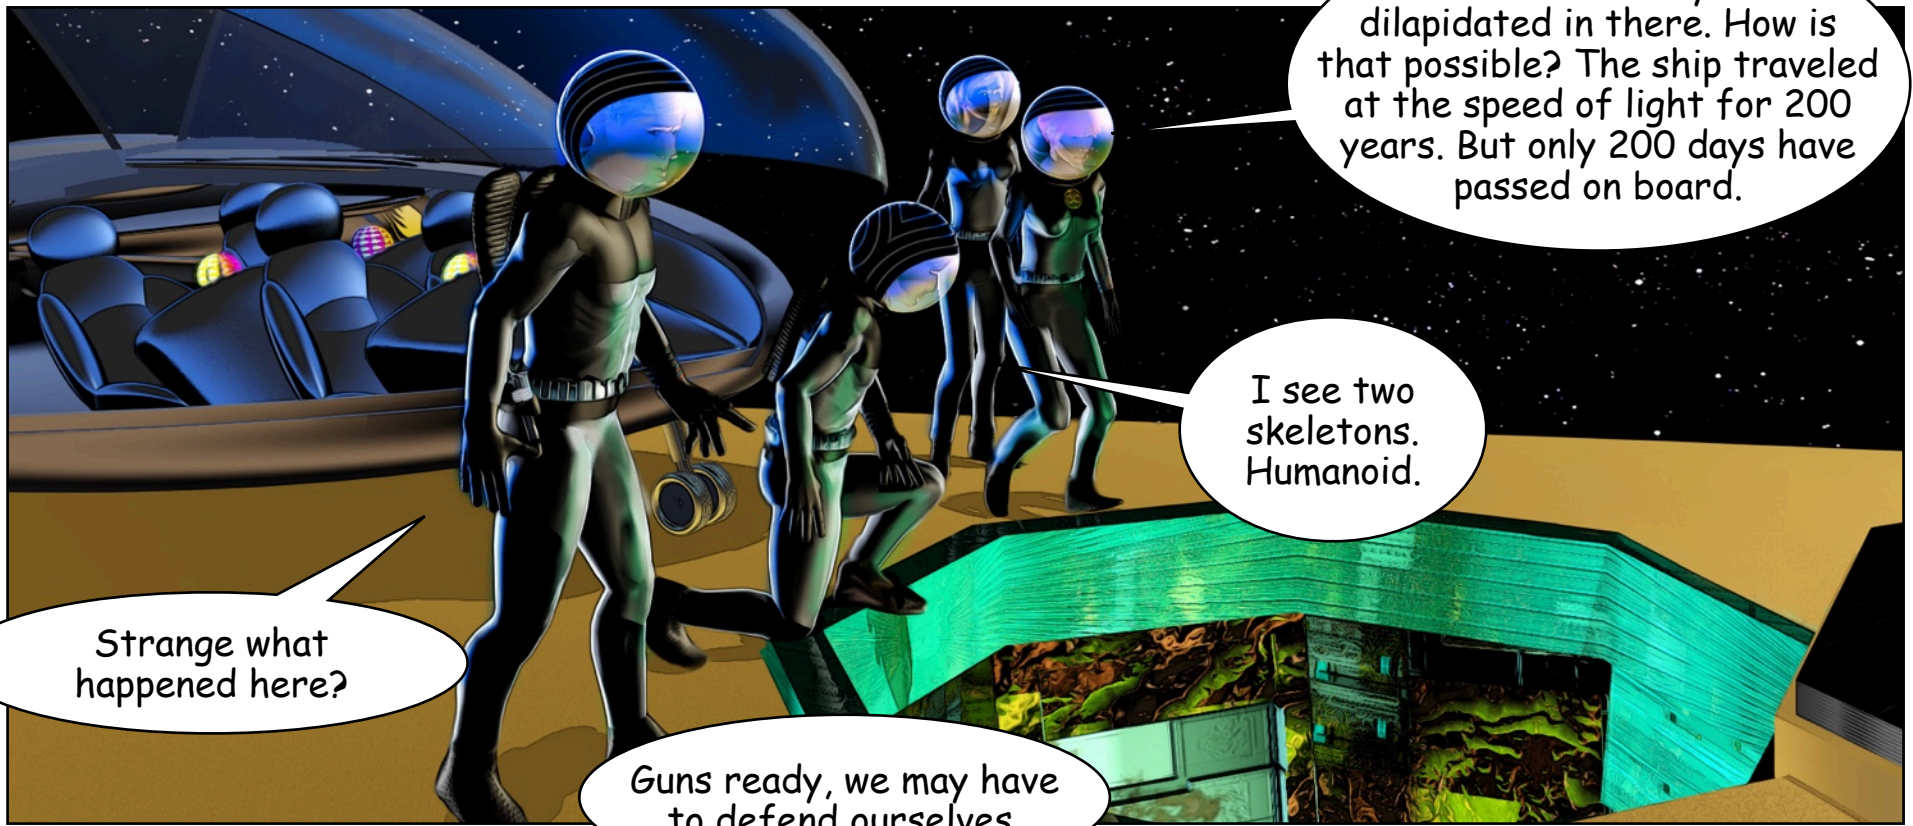

There, a bulkhead opens.

Let's land there.

Unusual. Only this little bulkhead reacted and opened.

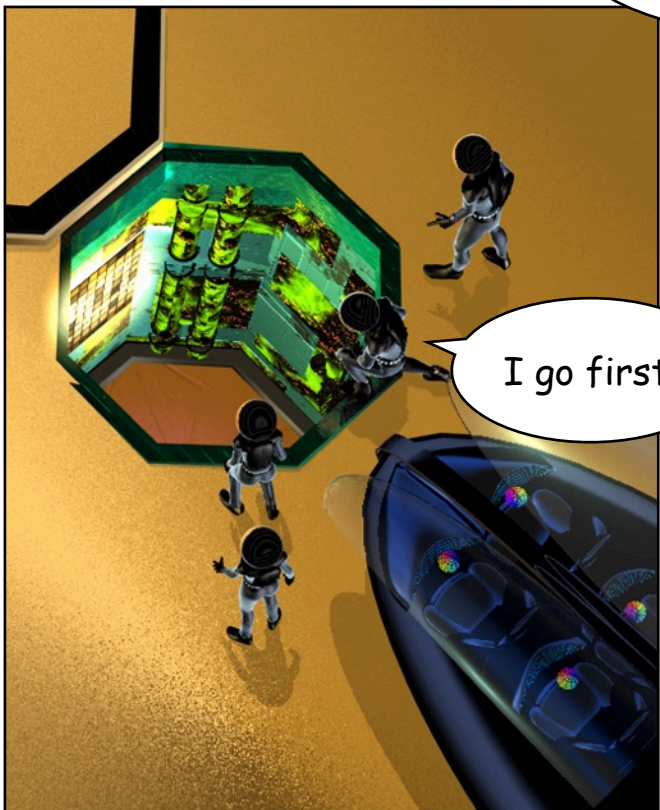

It looks very dilapidated in there. How is that possible? The ship traveled at the speed of light for 200 years. But only 200 days have passed on board.

I see two skeletons. Humanoid.

Strange what happened here?

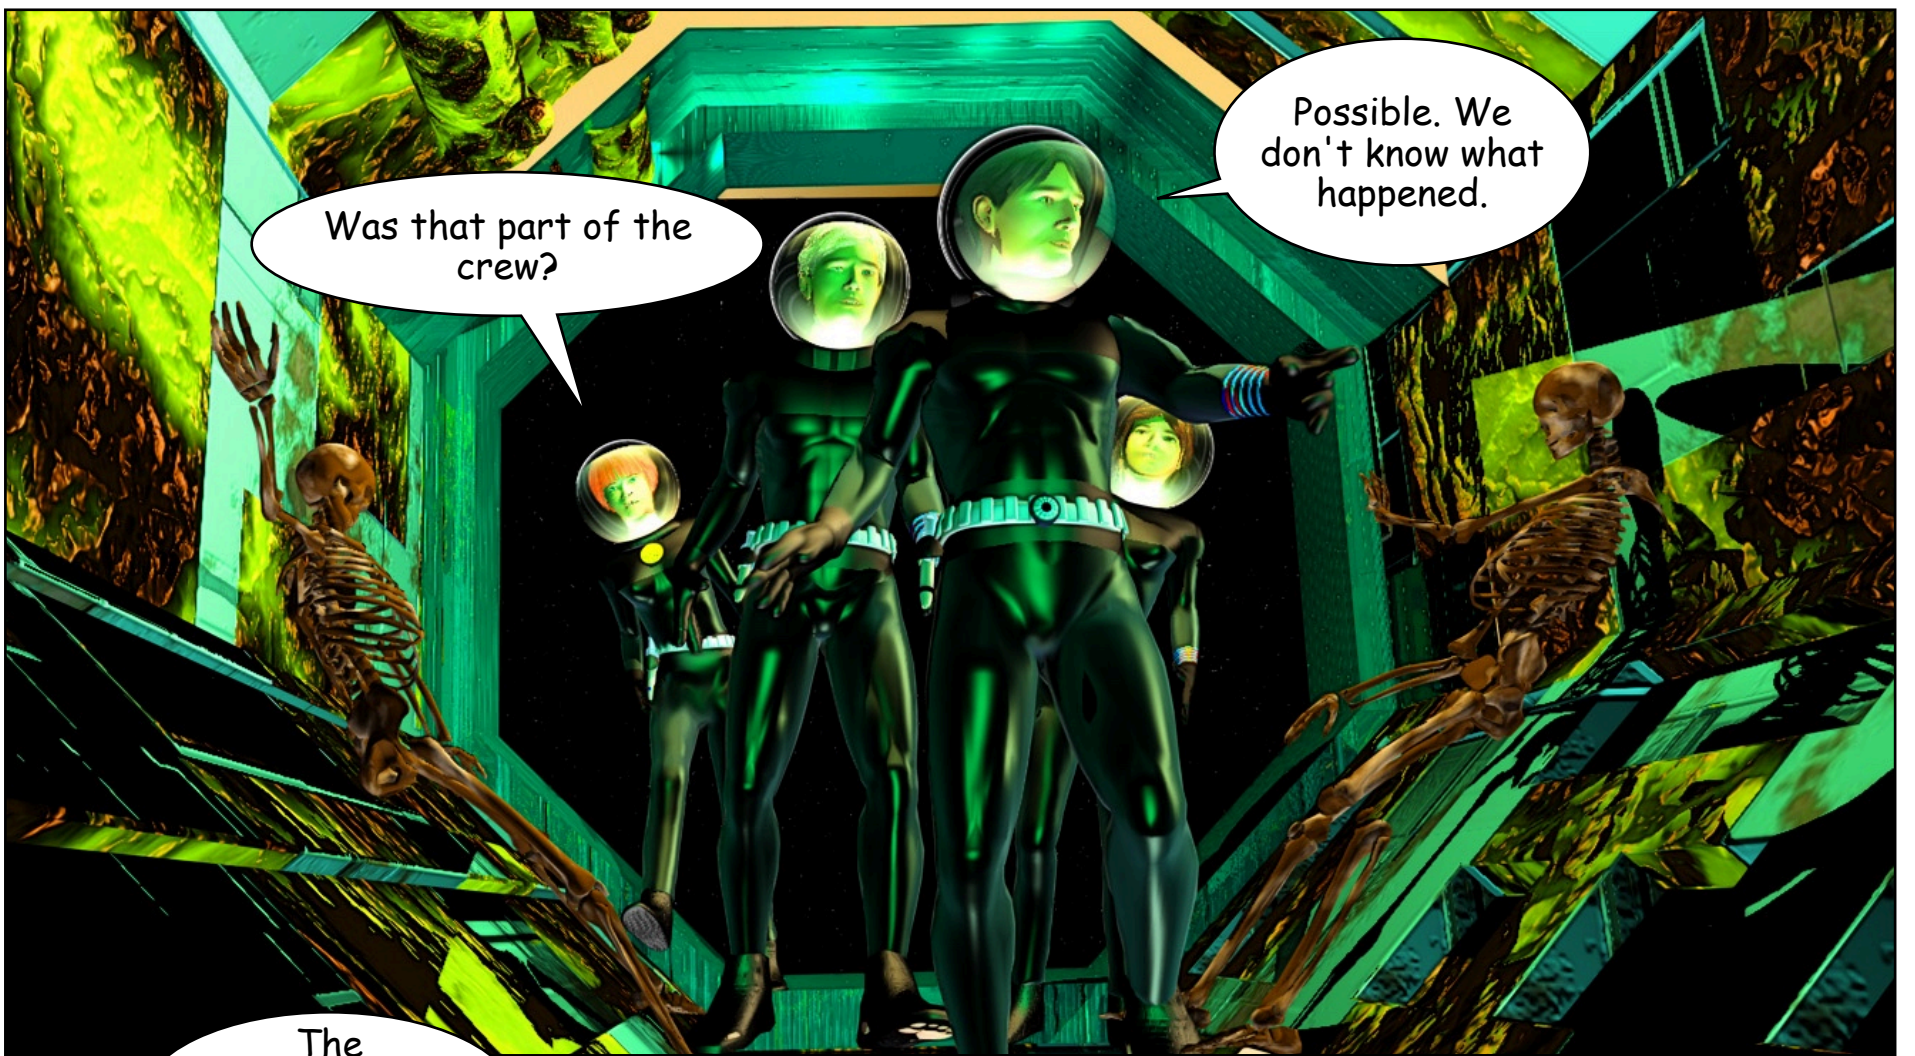

Guns ready, we may have to defend ourselves.

I go first.

Warning! Gravitational change.

Was that part of the crew?

Possible. We don't know what happened.

The outer bulkhead has closed.

And the lock fills with air.

So go on. Keep the helmets active.

It could be dangerous. But we have to find out what happened here.

A distributor. Where to go now?

Here it goes further inside. I open the bulkhead.

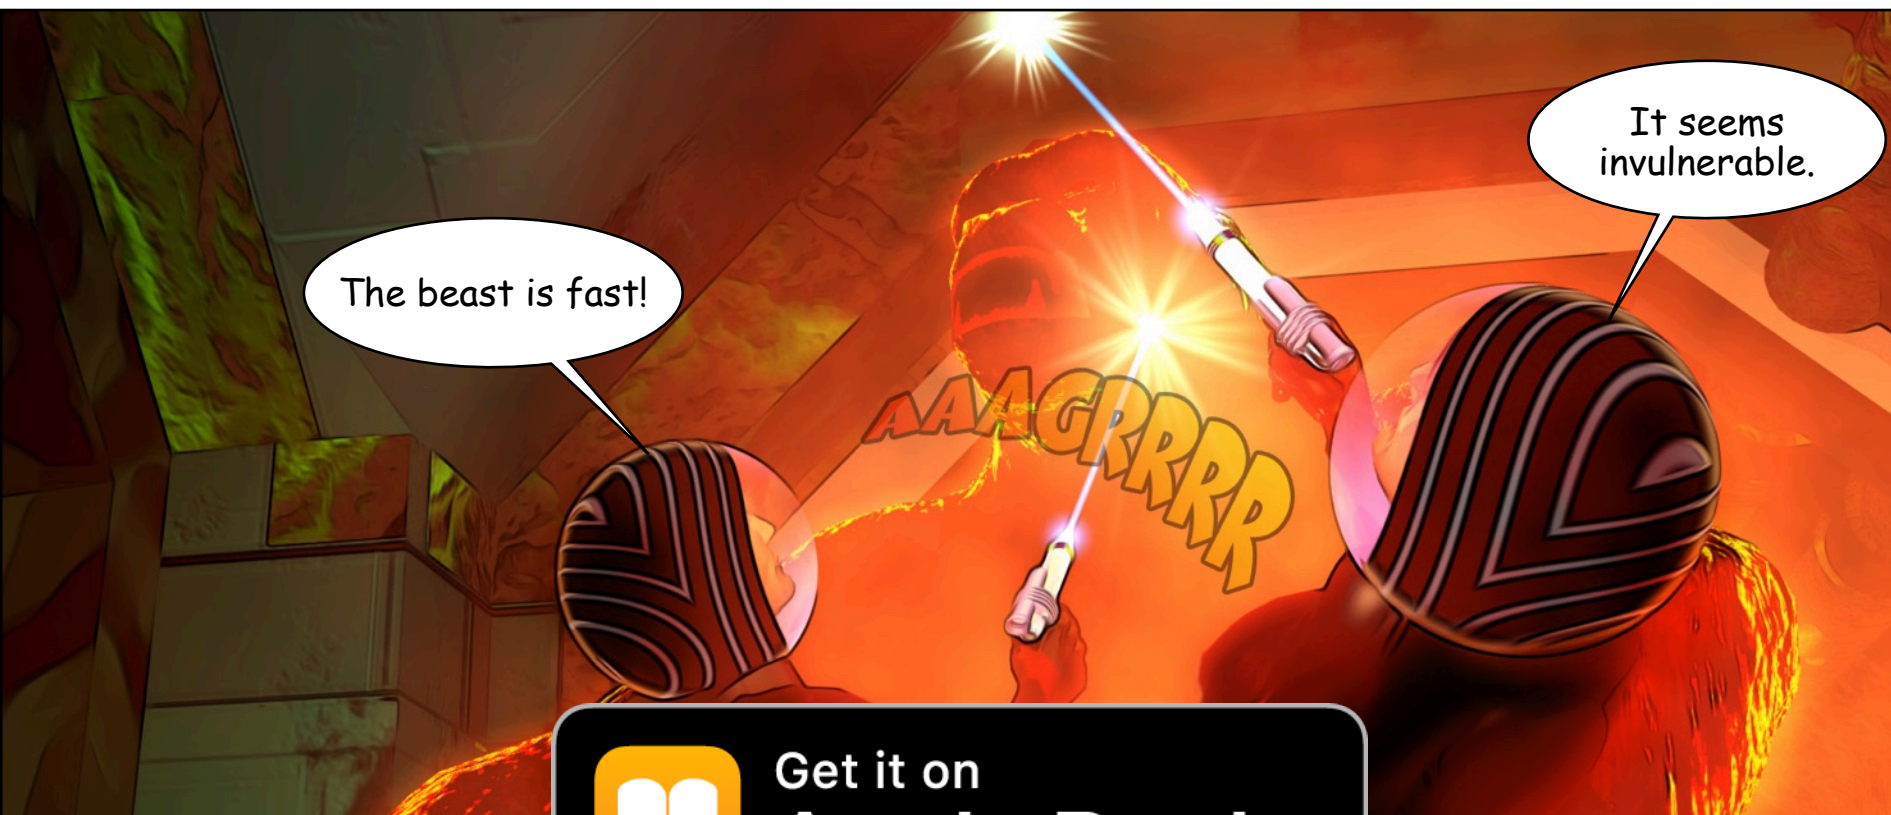

Open fire!

Negotiating is pointless ehre.

I agree with you.

GRRRRROOOOARR

The beast is fast!

It seems invulnerable.

AAAGRRRR
