KEY OF TIME

Sol system 2521 AD

The planetary system of our sun is new, fast and explored manned spaceships. Many people leave the earth captured by the longing to discover new worlds. Colonies and Bases are also established in the most remote locations of the Sol system.

Some brave people set out into interstellar space to travel to distant planets in our galaxy.

The "Cybernetic War", which begins in 2995 AD, stops this development.

At the end of the war in 3000 AD it will the Solar Parliament formed. Biological and biogenic humanity will form from now on together the new humanity of the Sol system.

A new era is introduced in the Sol system.

The year 1 ST (solar time) begins.

In 196 ST a small special unit is formed, which is able to research strange processes in space.

The EVEN·X

The LOONA receive a message and Lisa finds a spaceship deep in the cave system of a small planet. She travels by ship to the HEART OF THE UNIVERSE.

Five days before the arrival of the BlueStar at LOONA'S Stern: During a lootong, a group of LOONA receives the mental message of a being from the depths of space.

Space base Loon 1.  
The crew is en route to the SU-ANN, the Loona's first long-range starship in hyperspace.

We look to the mental imprint and we will find it.

The SU-ANN takes off, heading for an unknown destination.

All systems are working normally.

We are approaching the jump coordinates.

Attention! Activate helmets. Transfer to hyperspace - 3-2-1-now.

The spaceship disappears into hyperspace with colored luminous phenomena.

Suddenly in hyperspace.

Coordinates for entry into normal space are calculated. Danger! Disturbing energy impulses from the outside.

Differences in the control system.

Error in energy exchange. Get ready for a bumpy hyper jump.
